Packaging Compliance Statement – PPWR

The packaging used for our battery products placed on the EU market is sourced from external suppliers, who manufacture the packaging on our behalf.

All the suppliers are responsible for performing all necessary testing required to demonstrate compliance and for providing the relevant supporting documentation to us and we continuously remind them of their compliance obligations. As per supplier declarations, contractual compliance clauses, and supporting documentation made available to us, we can confirm that the packaging materials are designed, tested, and supplied in accordance with the applicable requirements of Regulation (EU) 2025/40 on packaging and packaging waste, including substance restrictions and design-for-recycling provisions.

Furthermore, we, as the economic operator placing packaged products on the EU market, ensure that all applicable labelling requirements are fulfilled. In addition, we maintain appropriate documentation and supplier assurances to demonstrate compliance and will make such information available to competent authorities upon request.

Sincerely,

Duracell Regulatory team
